Sinhala - Native

L.P.L.M.D.A.S. FERNANDO

OBJECTIVE

Motivated first-year Biotechnology undergraduate with a genuine interest in molecular biology and genetics research, seeking to apply strong academic writing, analytical, and problem-solving skills within a research-driven environment. Comfortable working independently to meet deadlines, proficient in Microsoft Office, and eager to build hands-on laboratory experience in human, animal, and plant genetics while contributing meaningfully to ongoing research projects.

WORK EXPERIENCE

January 2026 - May 2026

Trainee Tour – Apple holidays

- Coordinated with team members to ensure the timely completion of daily operational and administrative tasks.
- Communicated professionally with clients and suppliers while supporting customer service and maintaining positive business relationships.
- Performed accurate data entry and maintained organized digital records using Microsoft Office applications.
- Assisted in preparing reports, quotations, and administrative documents while demonstrating strong organizational skills, professionalism, and attention to detail.

EXTRACURRICULAR ACTIVITIES

- Member of Junior and Senior Choir - St. Bridget's Convent, Colombo 7
- Member of Senior Western Band - St. Bridget's Convent, Colombo 7
- Member of Senior Athletic Team - St. Bridget's Convent, Colombo 7

SKILLS

- Strong analytical and problem-solving skills
- Excellent written and verbal communication
- Teamwork and time management
- Attention to detail and accuracy
- Microsoft Word, Excel, and PowerPoint
- Basic laboratory safety awareness
- Scientific report writing

1. Job Advertisement Used

Position: Internship — Genetics Department

Organisation: Institute for Research & Development (IRD) – Health & Social Care

https://ird.lk/departments/genetics/internship/

The following is a summary of the job advertisement that served as the basis for the CV objective. The full advertisement is publicly listed on the organization's website (ird.lk).

Purpose of the Internship (as advertised):

- Develop the intern's ability to formulate novel research ideas in the fields of biotechnology and biomedical sciences.
- Build the intern's capacity and skills by providing hands-on experience in ongoing research.
- Engage the intern in disciplines of Human, Animal & Plant genetics alongside laboratory researchers, developing hands-on technical skills in molecular biology.
- Enhance the intern's soft skills in research and academics.

Requirements (as advertised):

- BSc (or currently reading for a BSc) in Biomedical Science, Biotechnology, Life Sciences, or a related field.
- Fluent in English with good academic writing skills.
- Able to work independently and efficiently to meet tight deadlines.
- Proficient with Microsoft Office (Word, Excel & PowerPoint).
- Familiar with the Windows operating system.
- Knowledge of basic statistics and bioinformatics is beneficial.

Source: Internship – Institute for Research & Development – in Health & Social Care, Genetics Department (ird.lk/departments/genetics/internship/). This advertisement was selected because it explicitly accepts first-year undergraduates who are still "reading" for their degree, matching the candidate's current academic stage.

2. Prompt Used to Generate the Profile

The following prompt was given to an AI assistant (Claude) to generate a draft CV objective/profile paragraph:

"I am a first-year BSc (Hons) Biotechnology undergraduate applying for an internship advertised by the Institute for Research & Development (IRD), Genetics Department. The internship requires: a BSc or current enrolment in Biomedical Science/Biotechnology/Life Sciences, fluent English with good academic writing skills, the ability to work independently under deadlines, proficiency in Microsoft Office, familiarity with Windows, and (as an advantage) basic statistics and bioinformatics knowledge. Based on these requirements and my own background — a first-year student with strong analytical and problem-solving skills, good written and verbal communication, teamwork, attention to detail, and basic laboratory safety awareness — generate a short, professional CV objective/profile paragraph (3–4 sentences) suitable for the top of my resume."

3. AI-Generated Output

The AI assistant returned the following draft objective, which was then reviewed and personalized before being placed on the CV:

Motivated first-year Biotechnology undergraduate with a genuine interest in molecular biology and genetics research, seeking to apply strong academic writing, analytical, and problem-solving skills within a research-driven environment. Comfortable working independently to meet deadlines, proficient in Microsoft Office, and eager to build hands-on laboratory experience in human, animal, and plant genetics while contributing meaningfully to ongoing research projects.

4. Ethical AI Usage Reflection

The AI-generated draft was not submitted as-is. It was reviewed against my own actual skills and experience listed on my CV to confirm every claim was accurate and genuinely mine. Wording was checked for grammar and tone, and the paragraph was shortened slightly for the CV layout. The content was kept because it truthfully reflects my current academic stage, my real skill set, and the specific requirements of the advertised internship, rather than generic claims. This process was used only to speed up drafting and improve phrasing — the underlying information and final decision on wording remained my own.
